*Integrating enterprise technology with manufacturing, distribution and service operations.*

When it's time to replace an existing ERP software solution or implement one for the first time, the evaluation, selection and acquisition processes can be overwhelming. Let our independent, experienced consultants save you time and money.

The ERP advisors at Meaden & Moore will help your organization define its specific business and technology requirements. Then, using our proven selection methodology, they zero in on the ideal software solution and technology partners to fit your specific technology, business and operational needs. Your risk is further minimized through the use of our proprietary tools, knowledge and experience within the enterprise software marketplace.

# ERP Navigator

We maintain a database of more than 3,000 functional and technological ERP criteria. Based on our research and experience with more than 100 leading ERP packages, we will identify technology solutions ideally suited to your business needs, goals and budget.

Our knowledgeable consultants will guide your team through our process to ensure your organization selects the right software solution. Our experts can assist your ERP project team from install to implementation to support for most Tier II and Tier III software solutions.

Meaden & Moore offers a proven track record of success with service based on six tenets:

**Objectivity** – Our goal is to serve our clients independent of software vendor bias. We:

- Do not represent any software vendor or software package
- Do not sell any software packages
- Do not accept commissions or finder's fees from the software vendors we recommend

**World-Class Framework** – Meaden & Moore's ERP Navigator plays a crucial role in helping businesses solve various challenges they face. Here are some ways ERP Navigator can emphasize its role in addressing your business challenges:

We'll guide your ERP team through our proven process.

#### STRUCTURED METHODOLOGY

With our Navigator tool and process, we have a predictable and structured process that minimizes risk and gets the job done faster.

#### OBJECTIVITY

We don't sell software and are not beholden to any software company.

#### CREATIVE SOLUTIONS

ERP systems can often do more than companies realize to solve challenges. We bring new ideas to the table and educate you along the way.

#### HANDS-ON

We are your extra set of hands whenever you need us. We don't just implement, we are here to support you along the way.

#### RELEVANT EXPERIENCE

We understand business. Our focus is on small and middle-market manufacturing and industrial companies.

#### BUSINESS FIRST

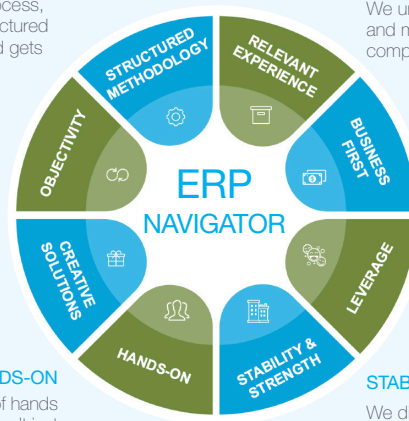

We are more than ERP experts– we have been advising companies on how to grow and prosper through a wide breadth of accounting and management services.

#### LEVERAGE

We don't work for the software companies– we know their strengths and weaknesses. We negotiate on your behalf and help you achieve a better than market price.

#### STABILITY & STRENGTH

We didn't just start doing this yesterday. Meaden & Moore has been in business over 100 years and have been advising clients on ERP for over 30 years. We are here for you in the long run.

**Research** – We maintain our own knowledge base of over 100 ERP software packages.

**Structure** – We offer a structured, phased approach, based on a thoroughly detailed definition and analysis of your organization's unique business requirements.

**Experience** – All Meaden & Moore consultants are former industry practitioners with extensive experience selecting, implementing and using multiple ERP software solutions.

**Recommendations** – Our experienced consultants will assist your team in identifying software vendors that can become long-term partners to support your organization's growth.
