# Aligning Your ERP and Business Strategies.

*To support future growth.*

You may be wasting valuable time and money if your ERP software is not in sync with your strategic business plan. The professionals at Meaden & Moore have the breadth of experience to review your systems and assure that your ERP software is supporting your organization to achieve its strategic objectives.

# Meshing ERP and Business Strategies.

When business and technology mesh efficiently, your ERP application can propel your organization to excellence. Meaden & Moore brings clarity and foresight to the relationship between your business and your technology plan. Our professional team can evaluate the current effectiveness of your ERP software and align strategies to maximize performance potential.

As your planning partner, we can discuss your needs, collect information, make evaluations and offer recommendations for maximizing your profitability and long-term success. Our ERP experts know the right technology for your goals and provide a spectrum of services from both a strategic planning and systems perspective, including:

- Overall strategic business planning
- IT support staff analysis
- ERP and technology roadmap
- IT and system support budgeting
- IT and ERP assessment for merger and acquisition due diligence
- Merger and acquisition systems consolidation analysis
- IT system audits
- Business process mapping
- Waste reduction and continuous process improvement

## System Assessment and Effectiveness
- Enterprise Resource Planning (ERP) and systems utilization and effectiveness review
- ERP optimization
- Project management
- ROI analysis

Call Meaden & Moore today at 866.752.4651 to discuss your needs. We will assemble an advisory team especially for you, with the tools and expertise you need to successfully meet your goals.

We care about your success personally.
